Ex.no 2 10/10/26

Experiment - 2 (A)

AIM:

Implement Echo client server using TCP / UDP Socket

Algorithm

TCP server

1. Start the program
2. Creat server socket using a port number
3. Wait using accept()
4. Create I/P & O/P stream
5. Recieve message from client
6. Send same back to client
7. Stop

TCP - client

1. Start the program
2. Create a socket & connect to server using port no.
3. Create I/P O/P streams
4. Read a message from user
5. Send same to server
6. Recieve the echoed message
7. Stop

I/P

Enter message Hello server

O/P

Server started
Waiting for client
Client connected
Message from client: Hello server

Result:

The program has been executed successfully

Experiment - 12 (B)

AIM:

To implement a chat-client server application using TCP/UDP sockets

Algorithm:

TCP chat server

1. Start the program
2. Create server socket
3. Wait using accept()
4. Create IP & OIP stream
5. Recieve message from client
6. Display message
7. Send reply to client
8. Close socket and stop program

TCP chat client:

1. Start the program
2. Create socket & connect to server
3. Create IIP & OIP streams
4. Read a message from client server
5. Sent message from client server
6. Display reply
7. Close the socket and stop program

I/P

client : Hello
Server : HI
client : How are you?
Server : I am fine
Clint : Exit

O/P

Server started
Waiting for client
client connected

Result :

The program has been executed successfully
