Experiment - 14

AIM:

To analyse the data write a code using RAW sockets to implement packet sniffing

Program:

```
#include <stdio.h>
#include <unistd.h>
#include <arpa/inet.h>
int main() {
    int sock;
    char buffer[65536];
    struct sockaddr saddr;
    int len = sizeof(saddr);
    while(1) {
        int n = recvfrom(sock, buffer, sizeof(buffer),
                         &saddr, (socklen_t*)&len);
        if (n>0) {
            struct iphdr *ip = (struct iphdr *) buffer;
            printf("Packet recieved\n");
        }
        close(sock);
        return 0;
    }
}
```

Completed 15/10/24

Result:

The program has been executed successfully
